EQSS Model6253 – OverWatch™ JLG ES Series Vertical Mast

**** Failure to follow this installation manual will void warranty ****

REV 1.2

04/01/2024

Model6253 OverWatch™ Installation Manual

Document # DO001307

AUTHORS:

Bhavani Kacharapu, Kieren Grogan

AUTHORISED BY:

Kieren Grogan

CHECKED BY:

Andrew Donegan

DOCUMENT ABSTRACT:

This installation manual details the installation instructions for installing the Model6253 OverWatch on a JLG ES Series vertical mast.

PRODUCT NAME:

Model6253 OverWatch Operator Detection System

REFERENCE DOCUMENTS:

DO0001195 Model6253 OverWatch User Manual

CURRENT DOCUMENT REVISION:

1.2

REVISION INFORMATION:

- 1.0 Initial Document Creation for system installation on a JLG ES Series vertical mast
- 1.1 Inclusion of harness schematics and instructions for plug and play installation
- 1.2 Inclusion of sensor guard V2 and update of machine configuration instructions

Important Information

Information contained in this publication regarding this device's applications and the like, is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that the application or our equipment meets with your specifications.

EQUIPMENT SAFETY SYSTEMS MAKE NO REPRESENTATIONS OR WARRANTIES OF ANY KIND, WHETHER EXPRESSED OR IMPLIED, WRITTEN OR ORAL, STATUTORY OR OTHERWISE, RELATED TO THE INFORMATION, INCLUDING, BUT NOT LIMITED TO, IT'S CONDITION, QUALITY, PERFORMANCE, MERCHANTABILITY OR FITNESS FOR PURPOSE.

Equipment Safety Systems disclaims all liability arising from this information and its use. Use of Equipment Safety Systems' products as critical components in life support systems is not authorised except with express written approval by Equipment Safety Systems. No licenses are conveyed, implicitly or otherwise, under any Equipment Safety Systems intellectual property rights.

N23041

This is a class A product certified to AS/NZS CISPR 22:2006. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Preparation

Required Tools

The OverWatch has been designed to be fitted using basic workshop tools. Shown below is a list of tools required to complete the installation.

| Item | Tool / Description |
|------|----------------------------|
| 1 | Electric Drill |
| 2 | Centre punch |
| 3 | Hammer |
| 4 | Side Cutters |
| 5 | Drill 20mm |
| 6 | Drill 5.0mm |
| 7 | Drill 12mm |
| 8 | Metric sockets or spanners |
| 9 | Needle nose pliers |
| 10 | Screw drivers |

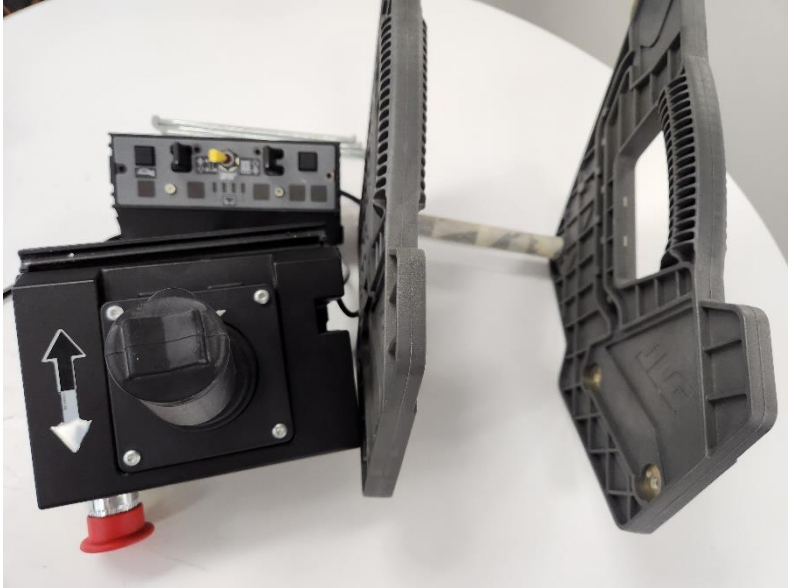

Installation Time

The suggested time required to install the OverWatch is as detailed below.

| Task | Estimated Time (Minutes) |
|---|--------------------------|
| Open the operator control box | 5 |
| Drilling of all mounting holes for the various components | 15 |
| Mechanical assembly | 10 |
| Electrical assembly | 5 |
| Post installation system tests | 10 |
| Close the operator control box | 5 |
| Total | 50 |

Installation Instructions

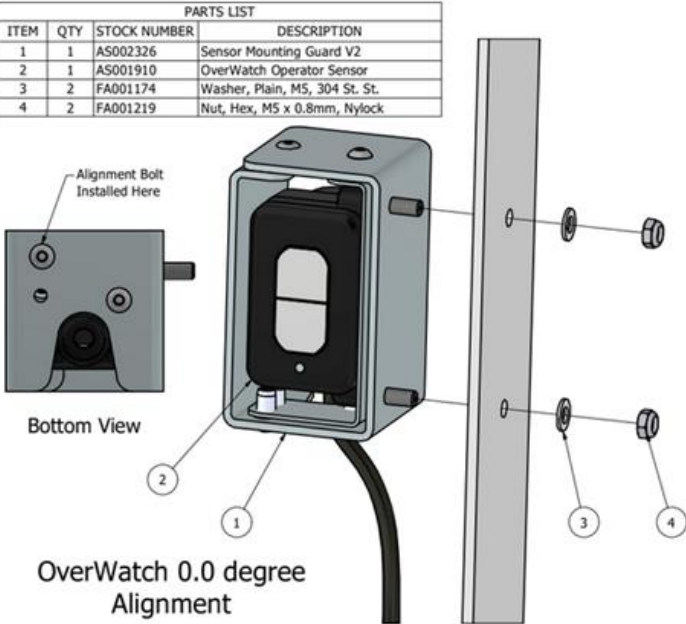

Operator Sensor

| Step | Description | Diagram |
|------|--|--|
| 1. | Remove top and bottom modules from the plastic control box housing. |  |
| 2. | Open the top module and drill a 12mm hole on the back panel of the enclosure to install the M12 cable gland. The position of the hole is detailed in the image as 30mm from the top edge and 40mm from the right edge. |  |

| Step | Description | Diagram |
|------|---|---|
| 3. | Open the bottom module and prepare to drill two holes, make sure that all internal cables are clear before drilling holes on the back panel of the control box enclosure as shown in the image. |  |
| 4. | <p>Operator Sensor Gland:</p> <p>Drill a 20mm hole to install the operator sensor cable gland in the location shown in top left of the image and feed the wire from the operator sensor into the enclosure.</p> <p>28mm from the top edge to the centre</p> <p>55mm from the left edge to the centre</p> |  |

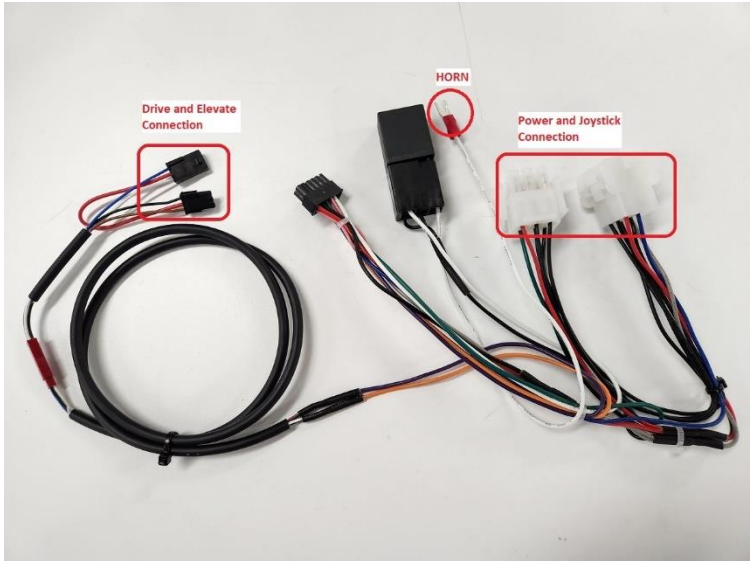

| Step | Description | Diagram |
|------|--|---|
| 5. | <p>Drive/Elevate Select Cable Gland:</p> <p>Drill a 12mm hole to install the M12 cable gland in the location shown in the image.</p> <p>Horizontal and vertical distance measured as 11mm as shown in the image.</p> <p>Note: Install cable gland at the exact location shown in image</p> <p>Feed the two-core cable from the OverWatch loom through the gland out of the enclosure.</p> |   |

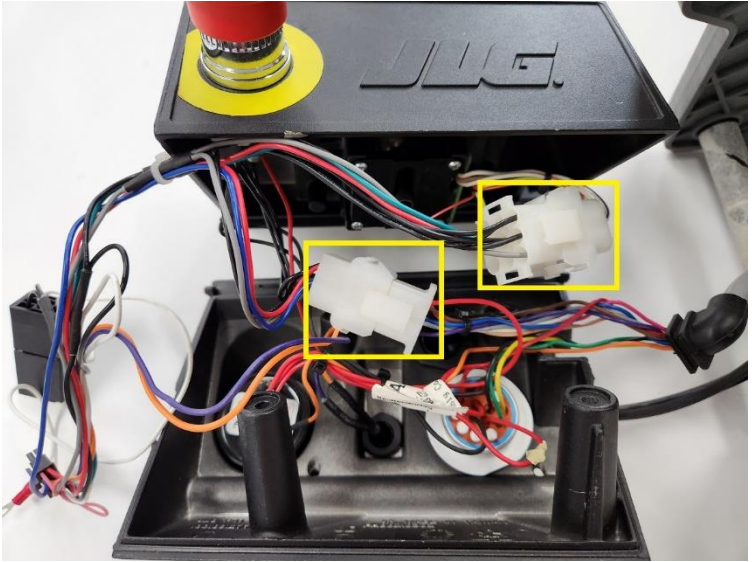

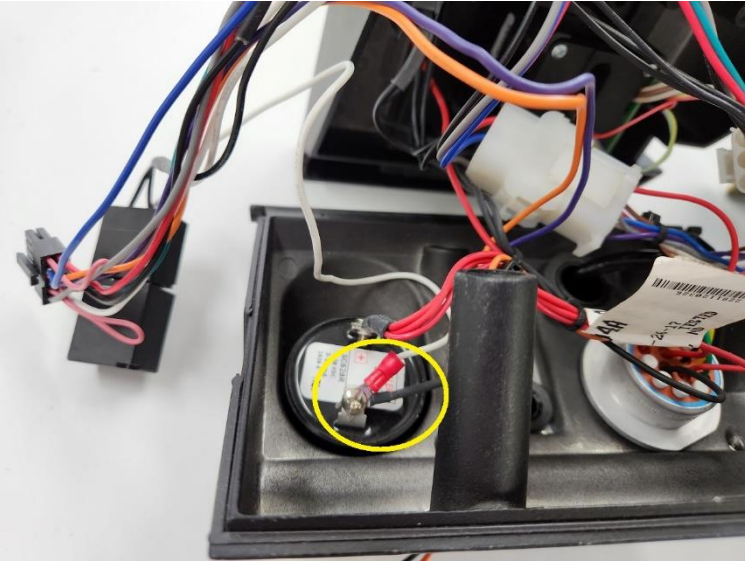

| Step | Description | Diagram |
|------|---|--|
| 6. | <p>Run the two-core cable from the bottom unit to the top unit, through the two M12 cable glands installed.</p> <p>Please refer to the adjacent image for two-core cable.</p> |   |

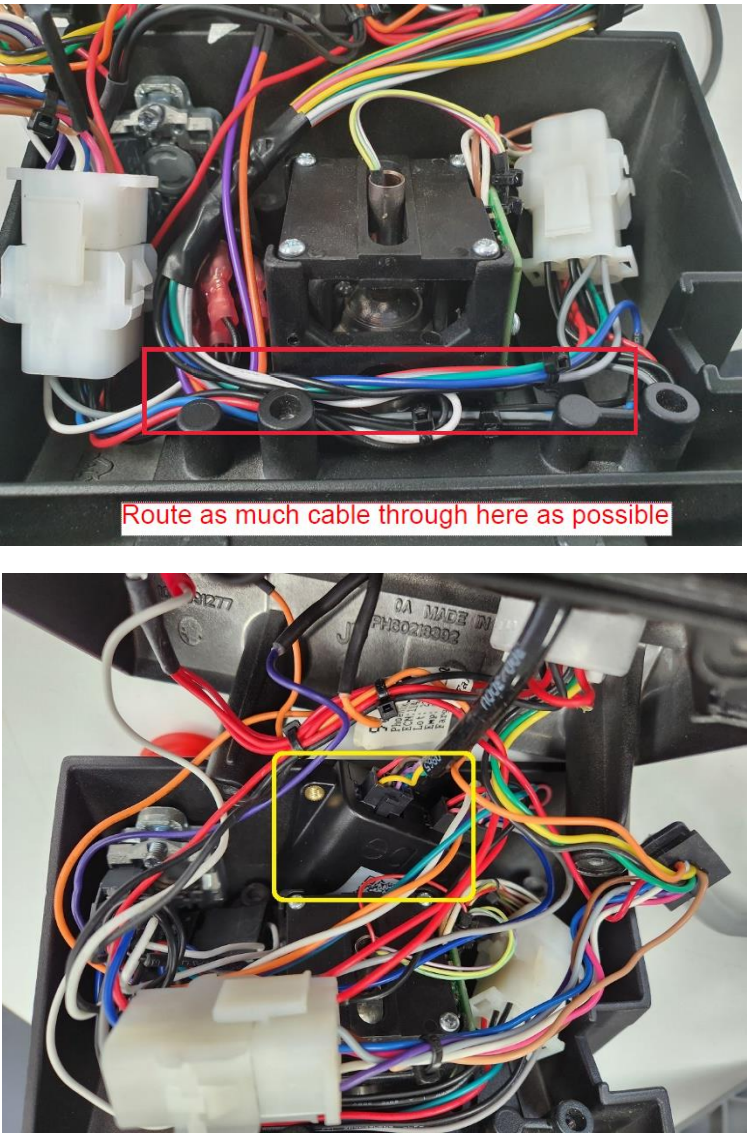

| Step | Description | Diagram | | | | | | | | | | | | | | | | | | | | | | | | |
|------------|---|--|--------------------------------|--|--|--|------|-----|--------------|-------------|---|---|----------|--------------------------|---|---|----------|---------------------------|---|---|----------|--------------------------------|---|---|----------|------------------------------|
| 7. | <p>Sensor Mounting Guard V1 (ME001794)</p> <p>Mount the operator sensor to the mounting bracket ME001835 by using M4x12mm washers and security bolts.</p> |  | | | | | | | | | | | | | | | | | | | | | | | | |
| 8. | <p>Sensor Mounting Guard V2 (AS002326)</p> <p>This guard (AS002326) supersedes the original V1 design. Mount the operator sensor to the mounting bracket (ME001835) using the M5 nuts and washers. Make sure that the sensor is on the 0.0-degree angle, such that it is not twisted away from the joystick.</p> <p>The 0.0-degree angle is achieved by using the bolt hole as show in the image.</p> | <div><table border="1"><thead><tr><th colspan="4">PARTS LIST</th></tr><tr><th>ITEM</th><th>QTY</th><th>STOCK NUMBER</th><th>DESCRIPTION</th></tr></thead><tbody><tr><td>1</td><td>1</td><td>AS002326</td><td>Sensor Mounting Guard V2</td></tr><tr><td>2</td><td>1</td><td>AS001910</td><td>OverWatch Operator Sensor</td></tr><tr><td>3</td><td>2</td><td>FA001174</td><td>Washer, Plain, M5, 304 St. St.</td></tr><tr><td>4</td><td>2</td><td>FA001219</td><td>Nut, Hex, M5 x 0.8mm, Nylock</td></tr></tbody></table></div> <div></div> | PARTS LIST | | | | ITEM | QTY | STOCK NUMBER | DESCRIPTION | 1 | 1 | AS002326 | Sensor Mounting Guard V2 | 2 | 1 | AS001910 | OverWatch Operator Sensor | 3 | 2 | FA001174 | Washer, Plain, M5, 304 St. St. | 4 | 2 | FA001219 | Nut, Hex, M5 x 0.8mm, Nylock |
| PARTS LIST | | | | | | | | | | | | | | | | | | | | | | | | | | |
| ITEM | QTY | STOCK NUMBER | DESCRIPTION | | | | | | | | | | | | | | | | | | | | | | | |
| 1 | 1 | AS002326 | Sensor Mounting Guard V2 | | | | | | | | | | | | | | | | | | | | | | | |
| 2 | 1 | AS001910 | OverWatch Operator Sensor | | | | | | | | | | | | | | | | | | | | | | | |
| 3 | 2 | FA001174 | Washer, Plain, M5, 304 St. St. | | | | | | | | | | | | | | | | | | | | | | | |
| 4 | 2 | FA001219 | Nut, Hex, M5 x 0.8mm, Nylock | | | | | | | | | | | | | | | | | | | | | | | |

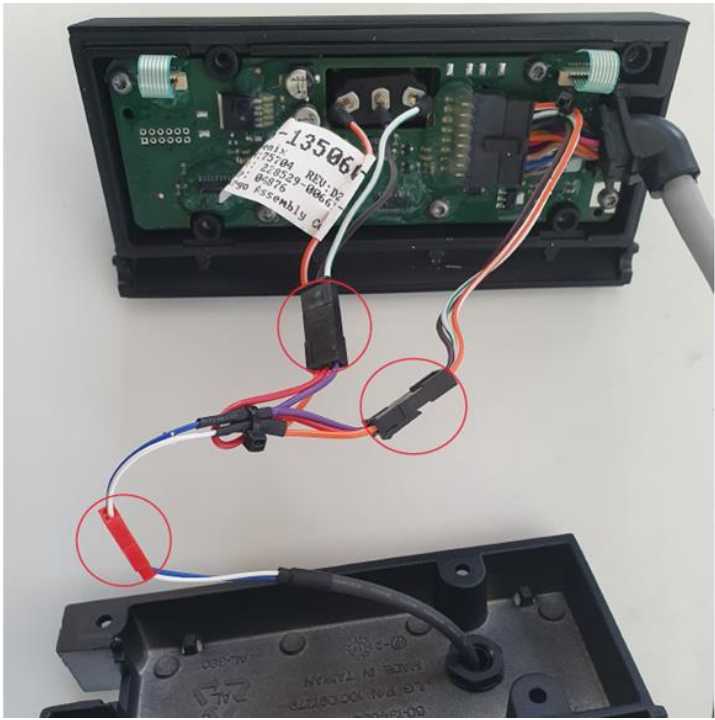

| Step | Description | Diagram |
|------|---|--|
| 9. | Remove screws from the top module as shown in the image. |  |
| 10. | Mount the module in the located position using the imperial #6 x 5/8 washers and bolts. |  |

Control Module

| Step | Description | Diagram |
|------|--|--|
| 1. | Wiring connections are made with the AS001937 harness. |  |
| 2. | The following connections will need to be done in the bottom module. |  |

| Step | Description | Diagram |
|------|--|--|
| 3. | Joystick and power: Disconnect the 9-pin connector from the JLG joystick and install the OverWatch harness in series. |  |
| 4. | Buzzer: At the back of the buzzer on the Negative side, install the white wire from the OverWatch harness. |  |

| Step | Description | Diagram |
|------|--|---|
| 5. | <p>Place the OverWatch ECU module in an angle in the location shown in the image and neatly manage the cables. Making sure the joystick connectors are positioned as shown.</p> <p>Make sure the cables are secure and in position as not to be pinched or damaged during the closure.</p> |  <p>Route as much cable through here as possible</p> |

| Step | Description | Diagram |
|------|---|--|
| 6. | The following connections will need to be done in the top module. |  |
| 7. | <p>Drive and Elevate Select:</p> <p>At the back the Drive/Elevate switch disconnect the existing black 3 pin connector and install the Drive/Elevate Select piggyback cable in between. Refer to the photo shown on the right.</p> |  |

| Step | Description | Diagram |
|------|---|---|
| 8. | <p>Re-assemble the bottom module and top module and mount to the plastic housing.</p> <p>Make sure the operator sensor cable runs clear to the joystick enclosure and tighten the M20 gland to seal the cable entry point.</p> <p>Care must be taken when closing the boxes, make sure all internal wires are clear of the box edges and bolt inserts, do not pinch or crush any internal wires when closing the boxes.</p> |  |

Post Installation Configuration

Overview

After the system has been installed it must be configured with the parameters to suit the machine. Follow the instructions below to configure the OverWatch.

Minimum system requirements

Any smart phone, tablet or laptop that meets the following requirements:

- The device can connect to a Wi-Fi access point
- The device has an up to date web browser installed. Firefox, Chrome or Safari are recommended.

Wi-Fi Connection & Web Page Access

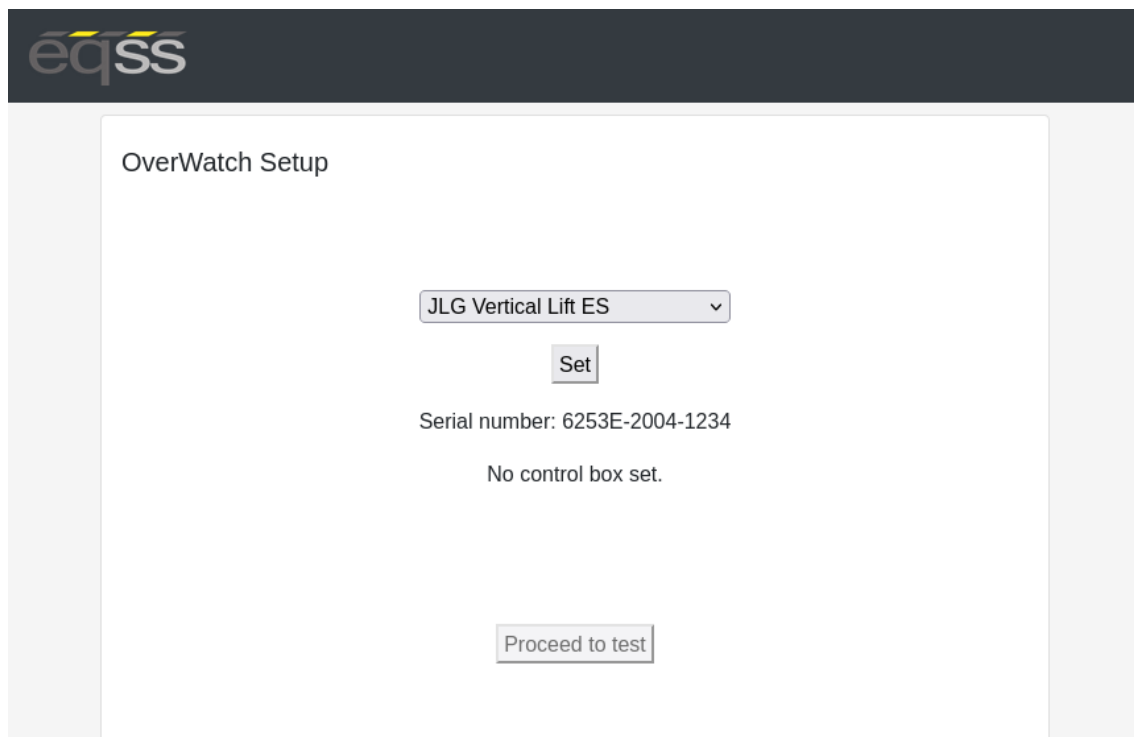

To enable the Wi-Fi connection on the OverWatch to complete the configuration follow the steps below.

1. Power down the platform control box with the ESTOP
2. Wait 5 seconds
3. Power up the platform control box with the ESTOP
4. While standing **in front of the operator sensor**, switch on the OverWatch
5. As the welcome chime starts to play, cover the sensor. The LED will flash white then black to acknowledge.
6. Remove your hand from the sensor. The LED will flash white then black to acknowledge.
7. After covering then uncovering the sensor this way 2 more times, "Wi-Fi On" will be announced
8. On your Wi-Fi enabled device (laptop, tablet, smartphone, etc), show the available wireless networks
9. Select the wireless network (starts with "overwatch") to connect to the OverWatch
10. When prompted, enter the **password 12345678**
11. Open your preferred web browser (Chrome, Firefox, Safari)
12. Enter the following into the address bar <http://192.168.4.1> to open the OverWatch main page

Machine Model Selection

Follow the instructions below to configure the OverWatch.

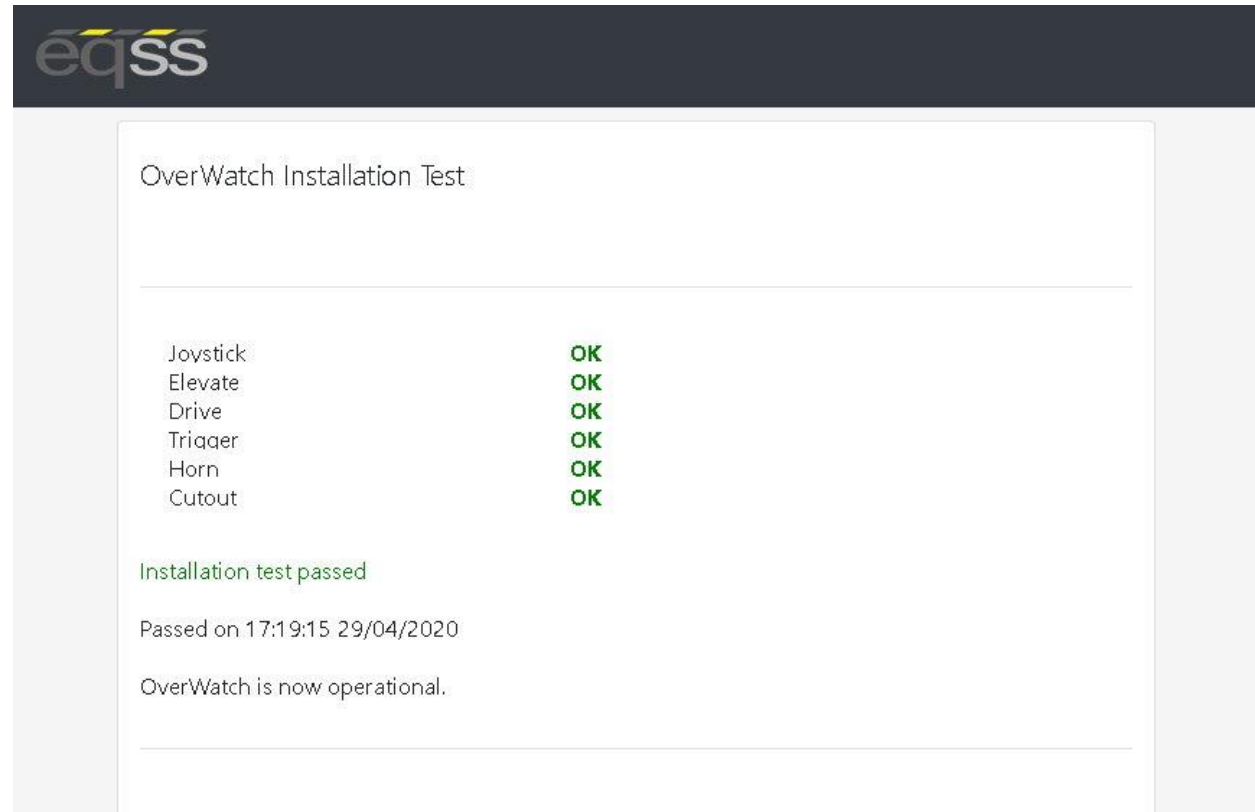

1. Select the Setup option
2. If there is a password field at the bottom of the page, follow the instructions in Change Model Configuration to obtain the password and enter the password field
3. Select the EWP Model from the drop-down list and click Set
4. Click on Proceed to test to begin the installation test

The screenshot shows the 'OverWatch Setup' screen. At the top is the eqss logo. Below it, the title 'OverWatch Setup' is displayed. In the center, there is a dropdown menu currently showing 'JLG Vertical Lift ES' with a downward arrow. Below the dropdown is a 'Set' button. Underneath the button, the text 'Serial number: 6253E-2004-1234' is shown. Below that, the text 'No control box set.' is displayed. At the bottom of the setup area is a 'Proceed to test' button.

Installation Test

After the model configuration has been set or updated an Installation Test must be performed. This will ensure the installation has been correctly performed and the OverWatch is functioning correctly. Follow the instructions on the web page to complete the Installation Test.

The screenshot shows a web interface for the 'OverWatch Installation Test'. At the top left is the 'eqss' logo. The main heading is 'OverWatch Installation Test'. Below this is a table with two columns: the first column lists components and the second column shows their status. All components are listed as 'OK' in green text. Below the table, a green message states 'Installation test passed'. This is followed by the text 'Passed on 17:19:15 29/04/2020' and 'OverWatch is now operational.'.

| | |
|----------|----|
| Joystick | OK |
| Elevate | OK |
| Drive | OK |
| Tripper | OK |
| Horn | OK |
| Cutout | OK |

Installation test passed

Passed on 17:19:15 29/04/2020

OverWatch is now operational.

Change Model Configuration

To reconfigure the OverWatch for a different model requires an authorisation password. The authorisation password is generated from the EQSS website. The EQSS website requires a login username and password, contact EQSS for these details.

Follow the instructions below to obtain an authorisation password. It is important to note that each ECU has a unique serial number and a unique password.

1. Open your web browser and enter the following into the address bar <http://www.eqss.com.au/overwatch> to open the Login page
2. Enter your username and password
3. Enter the EUC serial number which is shown on the setup page or on the ECU serial number sticker, also enter the owner and model details of the EWP and then click Generate Hash
4. The generated Hash code or password can be used to change the model configuration.

Details

| | |
|------------------------------|------------------------|
| Name | John Smith |
| Email | john.smith@company.com |
| Phone | +61 9 9999 9999 |
| EQSS Overwatch Serial Number | 6253E-2004-0000 |
| Scissor Lift Model | JLG Vertical Lift ES |
| Hash | 50244 |

System Settings

Default Parameters

The OverWatch is configured with the following default parameters.

| Setting Name | Description | Default |
|-------------------------------|---|---------|
| max_safe_velocity | This is the velocity threshold for the cutout in cm/s for drive mode. | 100 |
| max_safe_displacement | This is the maximum permitted distance in cm the operator may be away from the calibration position in drive mode. | 50 |
| max_safe_velocity_elevate | This is the velocity threshold for the cutout in cm/s for elevate mode. | 80 |
| max_safe_displacement_elevate | This is the maximum permitted distance in cm the operator may be away from the calibration position in elevate mode. | 50 |
| fwddispadj | The proportion of the calibration distance toward the sensor permitted to the operator. | -0.4 |
| fwdveloadj | The coefficient to apply to the maximum allowable velocity when the movement of the operator is toward the sensor. | 1.0 |
| zone_obstruction | If the lidar sensor reading is below this, the lidar is considered to be obstructed (with paint or thick coat of dust) and the system is cutout until the obstruction is cleared. | 5 |
| zone_minimum | The minimum calibration distance. If the operator is closer to the sensor than this "operator zone" will be announced. | 17 |
| zone_maximum | The maximum calibration distance. If the operator is further from the sensor than this "operator zone" will be announced. | 120 |
| adc_elevate_threshold | Threshold value for the elevate ADC input. | 300 |
| adc_drive_threshold | Threshold value for the drive ADC input. | 300 |
| adc_trigger_threshold | Threshold value for the trigger ADC input. | 2000 |
| adc_joystick_fwd_threshold | Forward threshold value for the joystick ADC input. | 1250 |
| adc_joystick_bwd_threshold | Backward threshold value for the joystick ADC input. | 1450 |
| throttle_time | Period after the trigger is pressed (ms) during which initial velocity reading is computed. | 500 |
| driving_state_timeout | Mode selection switch timeout (ms) | 7000 |

Polarity and Input Style

The table below describes each setting

| Setting Name | Description | Default |
|-------------------------|---|----------|
| joystick_drive_forward | Direction of joystick to move machine forward | forward |
| joystick_elevate_upward | Direction of joystick to move machine upwards | backward |
| elevate_polarity | Direction of signal logic | high |
| drive_polarity | Direction of signal logic | high |
| trigger_polarity | Direction of signal logic | high |
| joystick_polarity | Direction of signal logic | low |
| driving_state_input | Direct or timer based | direct |

Model6253 OverWatch™ Installation Manual

Document # DO001307

Harness Drawing AS001937

Replacement Parts

Replacement parts for this OverWatch kit are available from EQSS, please email sales@eqss.com.au

Shown below are the part numbers for the major components included in this model specific kit.

| Part Number | Description |
|-------------|--|
| AS001982 | OverWatch - Complete kit for JLG Vertical Lift ES Series |
| AS001910 | OverWatch - Operator sensor with M20 gland |
| AS001916 | OverWatch - Electronic Control Unit (ECU) |
| AS001937 | OverWatch – JLG Vertical Lift ES series harness |
| AS002326 | OverWatch - Sensor guard V2 |
| ME001835 | OverWatch – JLG Vertical Lift ES mounting bracket |
