Preparation

Required Tools

The OverWatch has been designed to be fitted using basic workshop tools. Shown below is a list of tools required to complete the installation.

Item	Tool / Description
1	Electric Drill
2	Centre punch
3	Hammer
4	Side Cutters
5	Drill 5.0mm
6	Drill 6.0mm
7	Step Drill (5 – 30mm)
8	Metric sockets or spanners
9	Needle nose pliers
10	Screw drivers

Installation Time

The suggested time required to install the OverWatch on the Genie GS-E is as detailed below.

Task	Estimated Time (Minutes)
Drilling of all mounting holes for the various components	10
Mechanical assembly	5
Electrical assembly	10
Post installation system tests	10
Total	35

Installation Instructions

Operator Sensor

Step	Description	Diagram
1.	Remove the joystick controller from the metal housing.	
2.	Drill two 6.0mm holes to mount the operator sensor in the position shown in the diagram. The sensor should be mounted at an angle of 40 degrees from the vertical. Drill two 5.0mm holes for the P-Clip installation at the side and rear of the controller box as shown in the image.	35.00mm THRU 38.00mm THRU 2X

3. Sensor Mounting Guard V1 (ME001794)

Mount the operator sensor in the **40-degree position** by using the wedges, sensor guard, bolts, and washers.

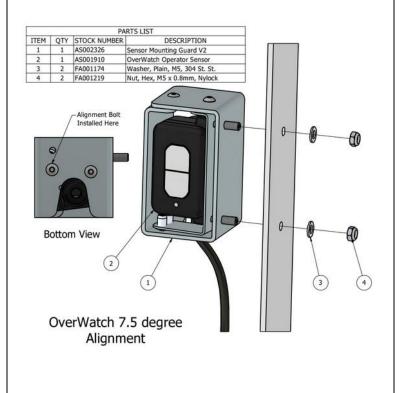

The orientation of the wedge blocks is critical for the correct positioning of the operator sensor. Make sure that the sensor is angled, such that it is **twisted outwards** from the joystick controller.

ITEM	QTY	PART NUMBER	DESCRIPTION	
1	1	AS001910	OverWatch Operator Sensor	
2	1	ME001794	OverWatch Operator Sensor Guard	
3	2	ME001798	Operator Sensor Alignment Wedge	
4	2	FA001422	M4 x 20mm Security Screw	
5	2	FA001235	M4 Plain Washer	
			3	

4. Sensor Mounting Guard V2 (AS002326)

This bracket (AS002326) supersedes the original V1 design. Attach the bracket in position using the M5 nuts and washers. Make sure that the sensor is on the 7.5-degree angle, such that it is twisted outwards from the joystick controller.

The 7.5-degree twist is achieved by rotating the sensor inside the assembly and using the bolt hole as show in the image.

Drill a **20mm** hole to run the operator sensor M20 Gland into the plastic joystick enclosure. The position of the hole is detailed as in the image. It is recommended to use a step drill for this hole.

4. Use a fine metal pick to clean the area shown in the yellow circles, on the adjacent image, to allow access to the pins and mounting holes.

This process removes the conformal coating on the PCB and allows electrical access to the drive, elevate, horn and outrigger connections on the joystick circuit board.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

5. Use a fine pair of side cutters to trim down the signal pins. These connections must be trimmed to be as flat as possible so that the spring pin from the OverWatch plug and play board can make suitable contact.

6. Trim down the **Elevate** signal pin as displayed in the image. Using a fine pair of side cutters make sure that the pin is trimmed flat.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

9. Trim down the two **Horn** signal pins as displayed in the adjacent image. Using a fine pair of side cutters make sure that the pins are trimmed flat.

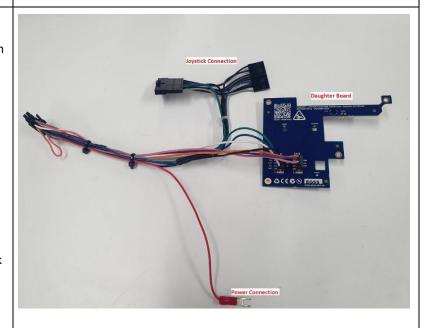

Wiring connections are made with the
 AS002240 harness which is supplied with the harness is the following hardware:

4 x 6.4mm spacers

4 x G4x19mm Bolts

These hardware components are critical and must be used to space the daughter board above the joystick circuit board.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

11. Mount the Overwatch daughter board on top of joystick circuit board using the provided screws and spacers in the kit.

Make sure that the board is sitting in the correct position and the spring pins are contacting the joystick signal pins.

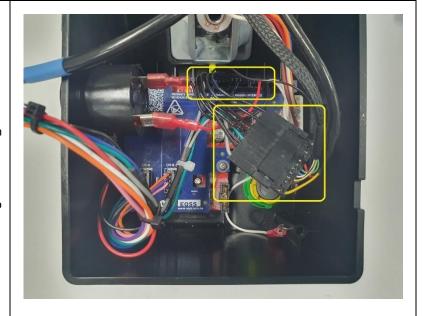

Use the cut-outs next to each spring pin to inspect that the contact is solid.

12. Install the Overwatch connectors in between the joystick and the circuit board.

Visually check that all pins from the original joystick connector have a corresponding cable on the Overwatch harness.

Reconnect the other connectors, which were disconnected in step 1 to the control box circuit board.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

13. At the back of the Estop, install the OverWatch Red Power cable to terminal 2 of the E-Stop. Same terminal as where the yellow wires are connected.

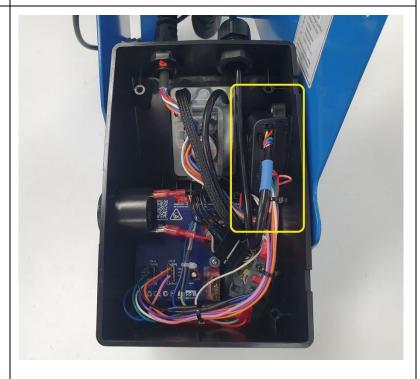

Note: This cable might need to be changed to terminal 1 if the Overwatch is powered with the E-stop pushed in

14. Mount the OverWatch ECU inside control box. The ECU is mounted on the right hand inside wall using the adhesive Velcro tape.

Run the operator sensor cable through the predrilled 20mm hole and secure the cable gland.

Connect the 8-pin connector from the operator sensor and the 12-pin connector from the overwatch loom to the ECU.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

Post Installation Configuration

Overview

After the system has been installed it must be configured with the parameters to suit the machine. Follow the instructions below to configure the OverWatch.

Minimum system requirements

Any smart phone, tablet or laptop that meets the following requirements:

- The device can connect to a Wi-Fi access point
- The device has an up to date web browser installed. Firefox, Chrome or Safari are recommended.

Wi-Fi Connection & Web Page Access

To enable the Wi-Fi connection on the OverWatch to complete the configuration follow the steps below.

- 1. Power down the platform control box with the ESTOP
- 2. Wait 5 seconds
- 3. Power up the platform control box with the ESTOP
- 4. While standing in front of the operator sensor, switch on the OverWatch
- 5. As the welcome chime starts to play, cover the sensor. The LED will flash white then black to acknowledge.
- 6. Remove your hand from the sensor. The LED will flash white then black to acknowledge.
- 7. After covering then uncovering the sensor this way 2 more times, "Wi-Fi On" will be announced
- 8. On your Wi-Fi enabled device (laptop, tablet, smartphone, etc), show the available wireless networks
- 9. Select the wireless network (starts with "overwatch") to connect to the OverWatch
- 10. When prompted, enter the password 12345678
- 11. Open your preferred web browser (Chrome, Firefox, Safari)

Enter the following into the address bar http://192.168.4.1 to open the OverWatch main page

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

Machine Model Selection

Follow the instructions below to configure the OverWatch.

- 1. Select the Setup option
- 2. If there is a password field at the bottom of the page, follow the instructions in Change Model Configuration to obtain the password and enter the password field
- 3. Select the EWP Model from the drop-down list and click Set
- 4. Click on Proceed to test to begin the installation test

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

Document # DO001519

Installation Test

After the model configuration has been set or updated an Installation Test must be performed. This will ensure the installation has been correctly performed and the OverWatch is functioning correctly. Follow the instructions on the web page to complete the Installation Test.

Change Model Configuration

To reconfigure the OverWatch for a different model requires an authorisation password. The authorisation password is generated from the EQSS website. The EQSS website requires a login username and password, contact EQSS for these details.

Follow the instructions below to obtain an authorisation password. It is important to note that each ECU has a unique serial number and a unique password.

- 1. Open your web and enter the following into the address bar http://www.eqss.com.au/overwatch to open the Login page
- 2. Enter your username and password
- 3. Enter the EUC serial number which is shown on the setup page or on the ECU serial number sticker, also enter the owner and model details of the EWP and then click Generate Hash
- 4. The generated Hash code or password can be used to change the model configuration.

System Settings

Default Parameters

The OverWatch is configurated with the following default parameters.

Setting Name	Description	Default
max_safe_velocity	This is the velocity threshold for the cutout in cm/s for drive mode.	105
max_safe_displacement	This is the maximum permitted distance in cm the operator may be away from the calibration position in drive mode.	60
max_safe_velocity_elevate	This is the velocity threshold for the cutout in cm/s for elevate mode.	95
max_safe_displacement_elevate	This is the maximum permitted distance in cm the operator may be away from the calibration position in elevate mode.	50
fwddispadj	The proportion of the calibration distance toward the sensor permitted to the operator.	0.7
fwdveloadj	The coefficient to apply to the maximum allowable velocity when the movement of the operator is toward the sensor.	1.0
zone_obstruction	If the lidar sensor reading is below this, the lidar is considered to be obstructed (with paint or thick coat of dust) and the system is cutout until the obstruction is cleared.	5
zone_minimum	The minimum calibration distance. If the operator is closer to the sensor than this "operator zone" will be announced.	17
zone_maximum	The maximum calibration distance. If the operator is further from the sensor than this "operator zone" will be announced.	120
adc_elevate_threshold	Threshold value for the elevate ADC input.	100
adc_drive_threshold	Threshold value for the drive ADC input.	100
adc_trigger_threshold	Threshold value for the trigger ADC input.	100
adc_joystick_fwd_threshold	Forward threshold value for the joystick ADC input.	1525
adc_joystick_bwd_threshold	Backward threshold value for the joystick ADC input.	1375
throttle_time	Period after the trigger is pressed (ms) during which initial velocity reading is computed.	500
driving_state_timeout	Mode selection switch timeout (ms)	7000

Replacement Parts

Replacement parts for this OverWatch kit are available from EQSS, for all inquiries please email sales@eqss.com.au
Shown below are the part numbers for the major components included in this model specific kit.

Part Number	Description
AS002217	OverWatch - Complete kit for Genie GS-E (Outrigers) Series Control Box
AS001910	OverWatch - Operator Sensor with M20 gland
AS001916	OverWatch – Electronic Control Unit (ECU)
AS002240	OverWatch - Genie GS-E Harness
AS002326	OverWatch - Sensor Guard V2
