Preparation

Required Tools

The OverWatch has been designed to be fitted using basic workshop tools. Shown below is a list of tools required to complete the installation

| Item | Tool / Description |
|------|----------------------------|
| 1 | Electric Drill |
| 2 | Centre punch |
| 3 | Hammer |
| 4 | Side Cutters |
| 5 | Drill 3.2mm |
| 6 | Drill 5.0mm |
| 7 | Metric sockets or spanners |
| 8 | Needle nose pliers |
| 9 | Screw drivers |
| 10 | Soldering Iron |

Installation Time

The suggested time required to install the OverWatch is as detailed below

| Task | | Estimated Time (Minutes) |
|---|-------|--------------------------|
| Open the operator control box | | 2 |
| Drilling of all mounting holes for the various components | | 15 |
| Mechanical assembly | | 10 |
| Electrical assembly | | 15 |
| Post installation system tests | | 10 |
| Close the operator control box | | 3 |
| | Total | 55 |

Installation Instructions

Operator Sensor

| Step | Description | Diagram |
|------|---|----------------------|
| 1. | Remove the front panel from the joystick enclosure. | |
| 2. | Drill two 5mm holes to install the operator sensor mounting bracket as shown in the image. The distance between the two holes is 30mm . | 30mm 30mm 60mm |

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

Model6253 OverWatch™ Installation Manual

Document # DO001625

5. Drill a **20mm** hole to install the operator sensor cable gland as shown in the image.

6. Mount the bracket in the located position by using M5 washers, nuts, and sockethead bolts.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

7. Sensor Mounting Guard V1 (ME001794)

Mount the operator sensor to the bracket (ME001834) by using M4 washers and security bolts.

Secure the operator sensor cable by using a P-clip.

Note: Use highlighted holes are used to position the Operator Sensor.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

8. Sensor Mounting Guard V2 (AS002326)

This guard (AS002326) supersedes the original V1 design. Mount the operator sensor on the mounting bracket (ME001834) using the M5 washers and nuts. Make sure that the sensor is on the **0.0-degree angle**, such that it is **not** twisted away from the joystick.

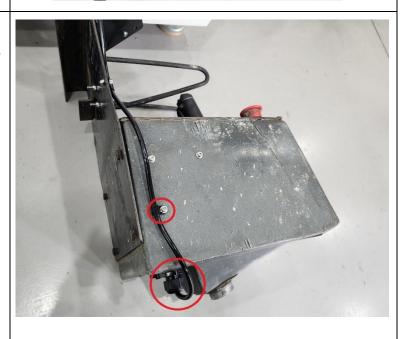

The 0.0-degree angle is achieved by using the bolt hole as show in the image.

9. Install the operator sensor cable gland and run the cable from the operator sensor into the enclosure.

Use the P-clip to secure the Operator Sensor cable.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

3. Joystick and power:

Disconnect the 9-pin connectors from the joystick and install the OverWatch joystick connectors in between as shown in the image.

4. Horn:

At the back of the horn push button, disconnect the existing horn connectors and install the OverWatch harness horn connectors in between.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

5. Speed Select:

At the back of the Speed Select switch, remove wire 57-2 (WHT/RED) and install OverWatch speed select connectors inbetween the removed wire (57-2) and the switch as shown in the image.

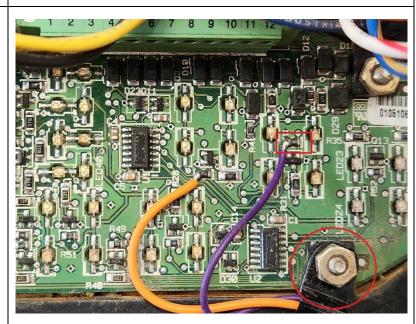

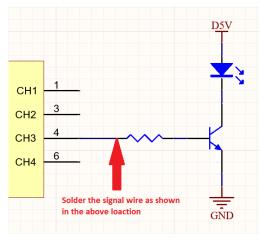

6. **Drive Select:**

At the back the LED circuit panel solder the **purple** drive select wire to the location as shown in the image.

Note: Use a P-clip to secure both drive and elevate signal wires before soldering.

Refer to the schematic drawing which shows a general overview of the connection into the circuit.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

Document # DO001625

7. Elevate Select:

At the back the LED circuit panel solder the orange elevate select wire to the location as shown in the image.

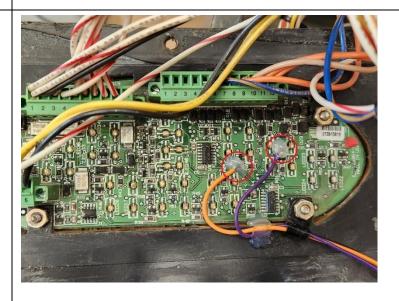

Refer to the schematic drawing which shows a general overview of the connection into the circuit.

8. Secure all the soldering joints with hot glue to avoid any damages to the LED circuit panel.

Wires must be secured with the P-Clip so there are no forces on the solder joints.

Post Installation Configuration

Overview

After the system has been installed it must be configured with the parameters to suit the machine. Follow the instructions below to configure the OverWatch.

Minimum system requirements

Any smart phone, tablet or laptop that meets the following requirements:

- The device can connect to a Wi-Fi access point
- The device has an up to date web browser installed. Firefox, Chrome or Safari are recommended.

Wi-Fi Connection & Web Page Access

To enable the Wi-Fi connection on the OverWatch to complete the configuration follow the steps below.

- 1. Power down the platform control box with the ESTOP
- 2. Wait 5 seconds
- 3. Power up the platform control box with the ESTOP
- 4. While standing in front of the operator sensor, switch on the OverWatch
- 5. As the welcome chime starts to play, cover the sensor. The LED will flash white then black to acknowledge.
- 6. Remove your hand from the sensor. The LED will flash white then black to acknowledge.
- 7. After covering then uncovering the sensor this way 2 more times, "Wi-Fi On" will be announced
- 8. On your Wi-Fi enabled device (laptop, tablet, smartphone, etc), show the available wireless networks
- 9. Select the wireless network (starts with "overwatch") to connect to the OverWatch
- 10. When prompted, enter the password 12345678
- 11. Open your preferred web browser (Chrome, Firefox, Safari)
- 12. Enter the following into the address bar http://192.168.4.1 to open the OverWatch main page

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

Document # DO001625

Machine Model Selection

Follow the instructions below to configure the OverWatch.

- 1. Select the Setup option
- 2. If there is a password field at the bottom of the page, follow the instructions in Change Model Configuration to obtain the password and enter the password field
- 3. Select the EWP Model from the drop-down list and click Set
- 4. Click on Proceed to test to begin the installation test

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

Document # DO001625

Installation Test

After the model configuration has been set or updated an Installation Test must be performed. This will ensure the installation has been correctly performed and the OverWatch is functioning correctly. Follow the instructions on the web page to complete the Installation Test.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

Change Model Configuration

To reconfigure the OverWatch for a different model requires an authorisation password. The authorisation password is generated from the EQSS website. The EQSS website requires a login username and password, contact EQSS for these details.

Follow the instructions below to obtain an authorisation password. It is important to note that each ECU has a unique serial number and a unique password.

- 1. Open your web browser and enter the following into the address bar http://www.eqss.com.au/overwatch to open the Login page
- 2. Enter your username and password
- 3. Enter the EUC serial number which is shown on the setup page or on the ECU serial number sticker, also enter the owner and model details of the EWP and then click Generate Hash
- 4. The generated Hash code or password can be used to change the model configuration.

75 Naxos Way, Keysborough 3173 Victoria Australia P: +61 3 8770 6555 E: support@eqss.com.au

System Settings

Default Parameters

The OverWatch is configured with the following default parameters.

| Setting Name | Description | Default |
|-------------------------------|---|---------|
| max_safe_velocity | This is the velocity threshold for the cutout in cm/s for drive mode. | |
| max_safe_displacement | This is the maximum permitted distance in cm the operator may be away from the calibration position in drive mode. | 50 |
| max_safe_velocity_elevate | This is the velocity threshold for the cutout in cm/s for elevate mode. | 80 |
| max_safe_displacement_elevate | This is the maximum permitted distance in cm the operator may be away from the calibration position in elevate mode. | 50 |
| fwddispadj | The proportion of the calibration distance toward the sensor permitted to the operator. | -0.75 |
| fwdveloadj | The coefficient to apply to the maximum allowable velocity when the movement of the operator is toward the sensor. | 1.0 |
| zone_obstruction | If the lidar sensor reading is below this, the lidar is considered to be obstructed (with paint or thick coat of dust) and the system is cutout until the obstruction is cleared. | 5 |
| zone_minimum | The minimum calibration distance. If the operator is closer to the sensor than this "operator zone" will be announced. | 17 |
| zone_maximum | The maximum calibration distance. If the operator is further from the sensor than this "operator zone" will be announced. | 120 |
| adc_elevate_threshold | Threshold value for the elevate ADC input. | 500 |
| adc_drive_threshold | Threshold value for the drive ADC input. | 500 |
| adc_trigger_threshold | Threshold value for the trigger ADC input. | 1000 |
| adc_joystick_fwd_threshold | Forward threshold value for the joystick ADC input. | 1100 |
| adc_joystick_bwd_threshold | Backward threshold value for the joystick ADC input. | 1400 |
| throttle_time | Period after the trigger is pressed (ms) during which initial velocity reading is computed. | 500 |
| driving_state_timeout | Mode selection switch timeout (ms) | 7000 |

Polarity and Input Style

The table below describes each setting

| Setting Name | Description | Default |
|-------------------------|---|---------|
| joystick_drive_forward | Direction of joystick to move machine forward | forward |
| joystick_elevate_upward | Direction of joystick to move machine upwards | forward |
| elevate_polarity | Direction of signal logic | high |
| drive_polarity | Direction of signal logic | high |
| trigger_polarity | Direction of signal logic | high |
| joystick_polarity | Direction of signal logic | Low |
| driving_state_input | Direct or timer based | direct |

Replacement Parts

Replacement parts for this OverWatch kit are available from EQSS, please email sales@eqss.com.au
Shown below are the part numbers for the major components included in this model specific kit.

| Part Number | Description |
|-------------|---|
| AS002319 | OverWatch - Complete kit JLG Mxx69LE Series |
| AS001910 | OverWatch - Operator Sensor with M20 gland |
| AS001916 | OverWatch - Electronic Control Unit (ECU) |
| AS002318 | OverWatch – JLG Mxx69LE Harness |
| AS002326 | OverWatch - Sensor Guard V2 |
| ME001834 | OverWatch – JLG Sensor Mounting Bracket |
