

## **Subject :** Installation of EQSS Overwatch System on Haulotte Machines

To whom it may concern,

With regard to the EQSS Overwatch Device Model 6253 intended for use on Haulotte scissor lift and vertical masts.

We understand that the Device is intended to improve safety use of the Machine. The Device is not fully integrated with the Machine and Haulotte cannot ascertain it will properly interface with the Machines. **Your attention is brought on the fact that improper interface may affect critical safety systems and result in serious injury.**

Under the following terms and conditions, Haulotte approves the installation of the EQSS Overwatch Device:

- the Device shall be installed only on Haulotte Machines designed only for Australia and New Zealand (AS/NZS 1418.10 only).
- Any and all verification/test remain the sole responsibility of EQSS, the owner and/or the user of the Machine.
- Haulotte is not liable for the Device's quality, performance, reliability, or compliance with any regulation, nor does Haulotte validate the content of the Device's documentation: this remains the sole responsibility of EQSS.
- All necessary EQSS references are to be kept with the Machine at all times, along with the Operators Manual and Maintenance Manual.
- The owner remains solely responsible for the decision to mount the Device on the Machine.
- The installation of the Device onto the Machine must be completed by competent personnel, following the manufacturer's references and specifically the schematic provided by EQSS. EQSS must provide the owner of the machines with all necessary information at any time.
- The Device must be fitted with the OEM Control Box system provided with the Machine (check with your Customer service contact for such references).
- Any change in documents or versions, even if brought to Haulotte's attention, will be the sole responsibility of EQSS.
- A complete test and pre-inspection of the Machine and/or the Device must be completed after installation of the Device on the Machine.
- The user must be familiar on the use of the Device.

### **Use of the Machines:**

Follow all safety rules and instructions from the User's Manual and local regulation.

The Device is not intended to replace proper inspection, use and/or maintenance of the Machine, nor does it replace adequate training, instruction, or proper use of the Machine in its working environment. The use of the Machine remains the sole responsibility of the Owner and/or user of the Machine.

Copy of this letter shall be kept at any time with the machines and brought to the attention of the user.

### **Safety and compliance:**

It is the responsibility of EQSS to perform a hazard analysis on the design, installation and use of the Device, and to ensure the Device complies with the essential health and safety requirements.

### **WARNING!**

**Failure to comply with all conditions, instructions and warnings contained in this letter, the User Manual and the EQSS Operating Instructions, could result in death or serious injury.**

### **Hold harmless:**

Haulotte assumes no responsibility or liability for any incident involving personal injury, property damage, or equipment damage, due to failure of the Device. Haulotte assumes no responsibility for the design or use of the Device.

EQSS, the Machine owner and/or the user hereby agree to indemnify and hold harmless Haulotte (and its parent and affiliated companies) against any and all liability, claim, losses, litigation costs and legal fees caused by, arising out of, or resulting from the installation and/or use of the Device.

**Should you not agree with the content of this letter, do not proceed with the Installation of the Device and do not use the machine if the Device is installed.**

This document is valid for the current version of the Device
